Objectives

**Data
Gathering**

Features

- Production Budget
- Domestic Gross, International Gross, Worldwide Gross
- Genre, Source, Creative Type, Production Method
- Vote Count, Vote Average
- Popularity
- Release Time
- Runtime
- Studio

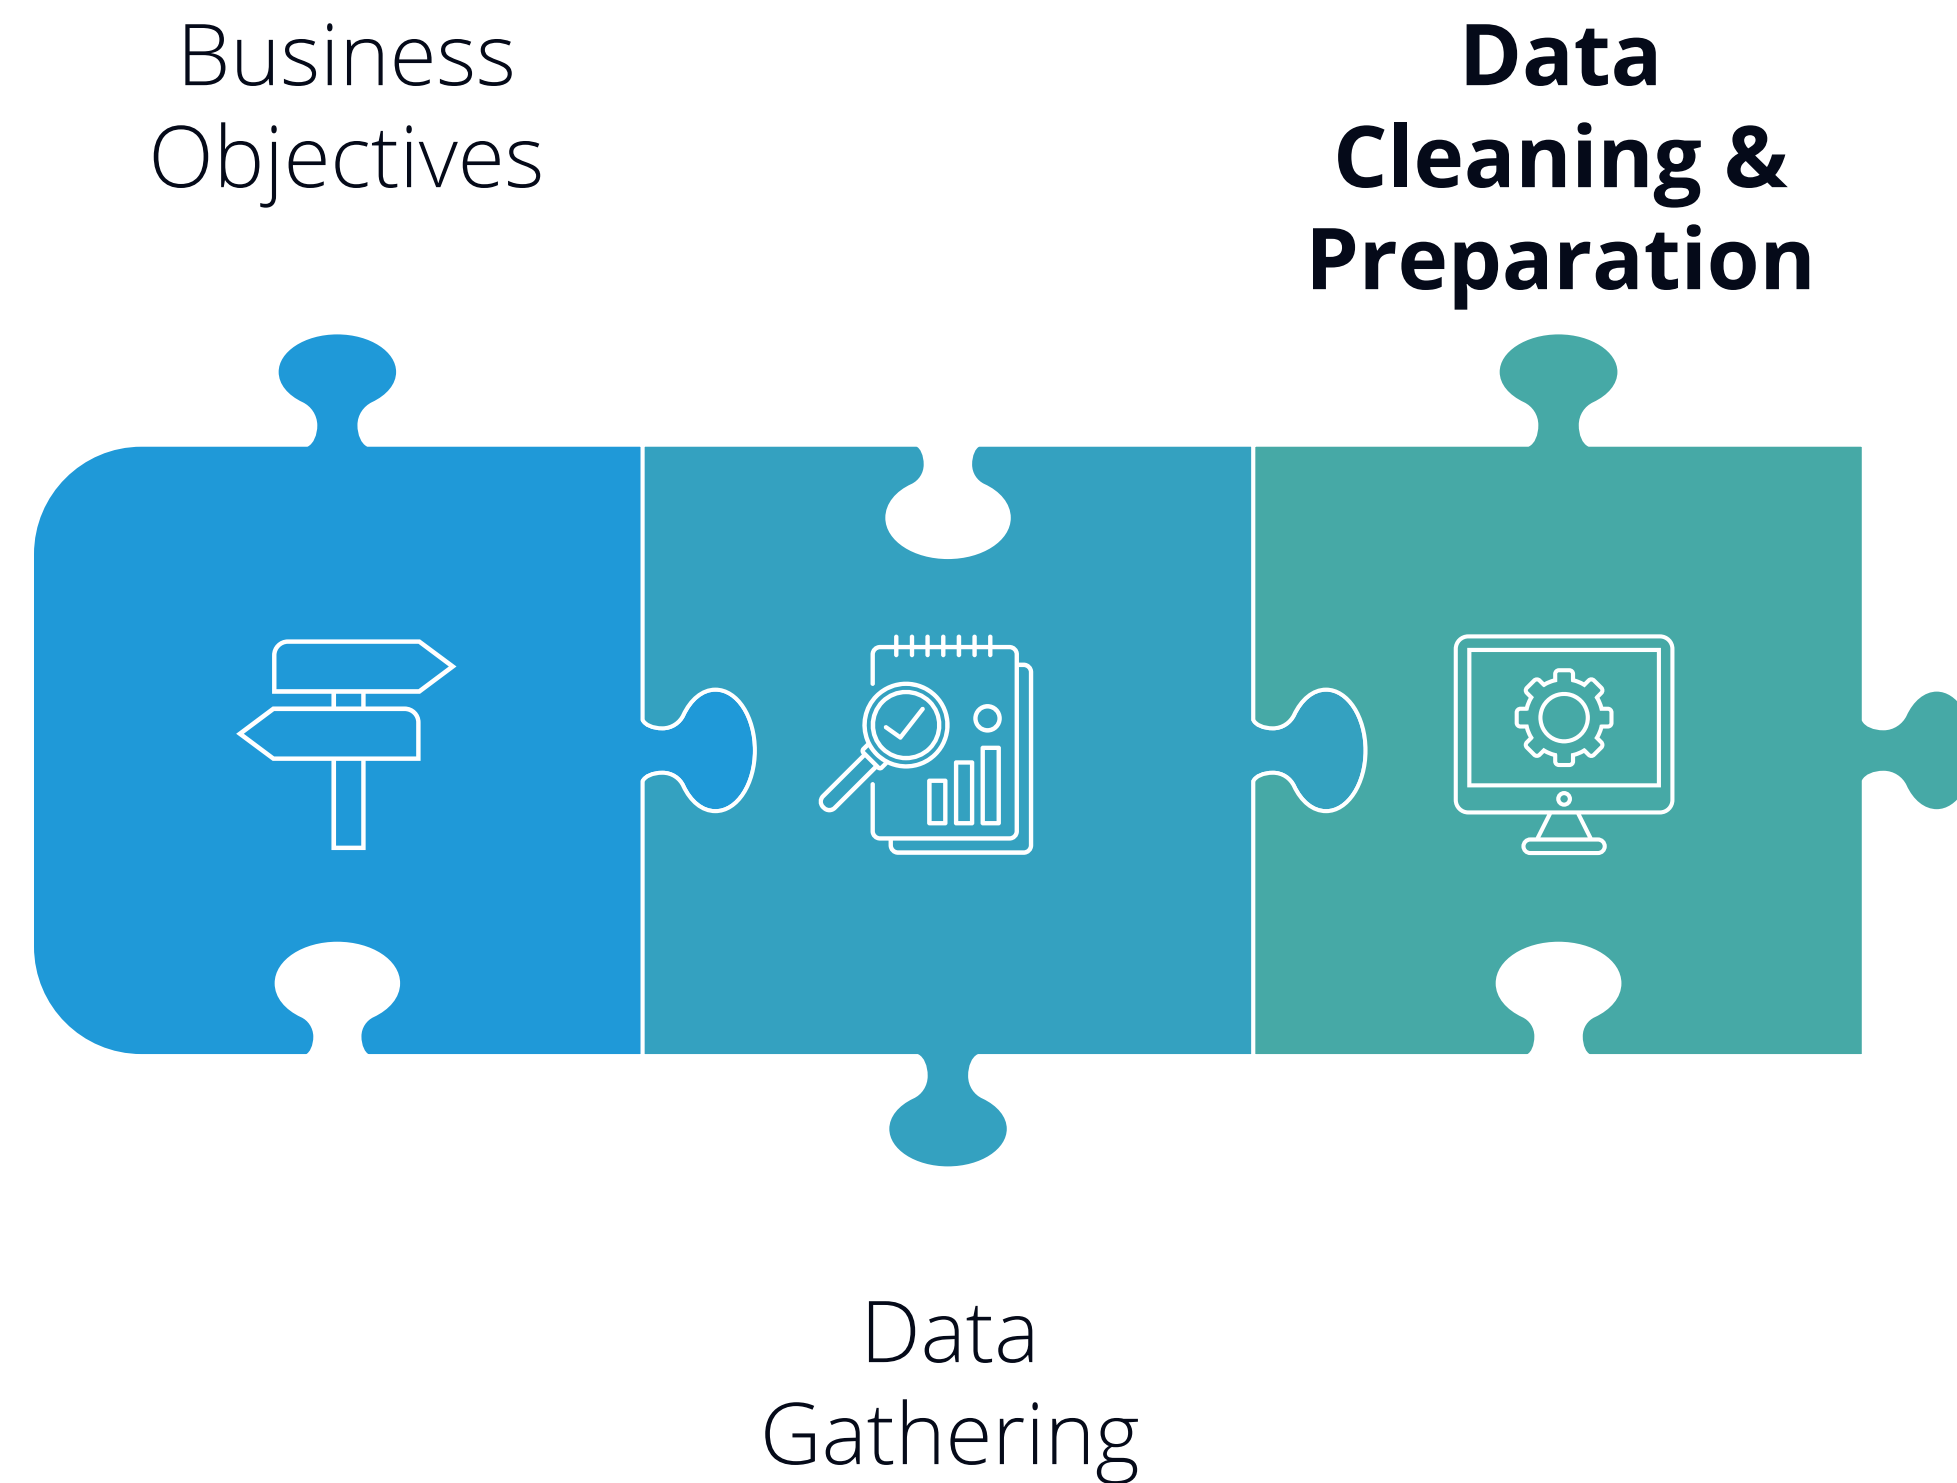

Data Sources

1. Box Office Mojo
2. IMDB
3. Rotten Tomatoes
4. TheMovieDB.org
5. The-Numbers.com

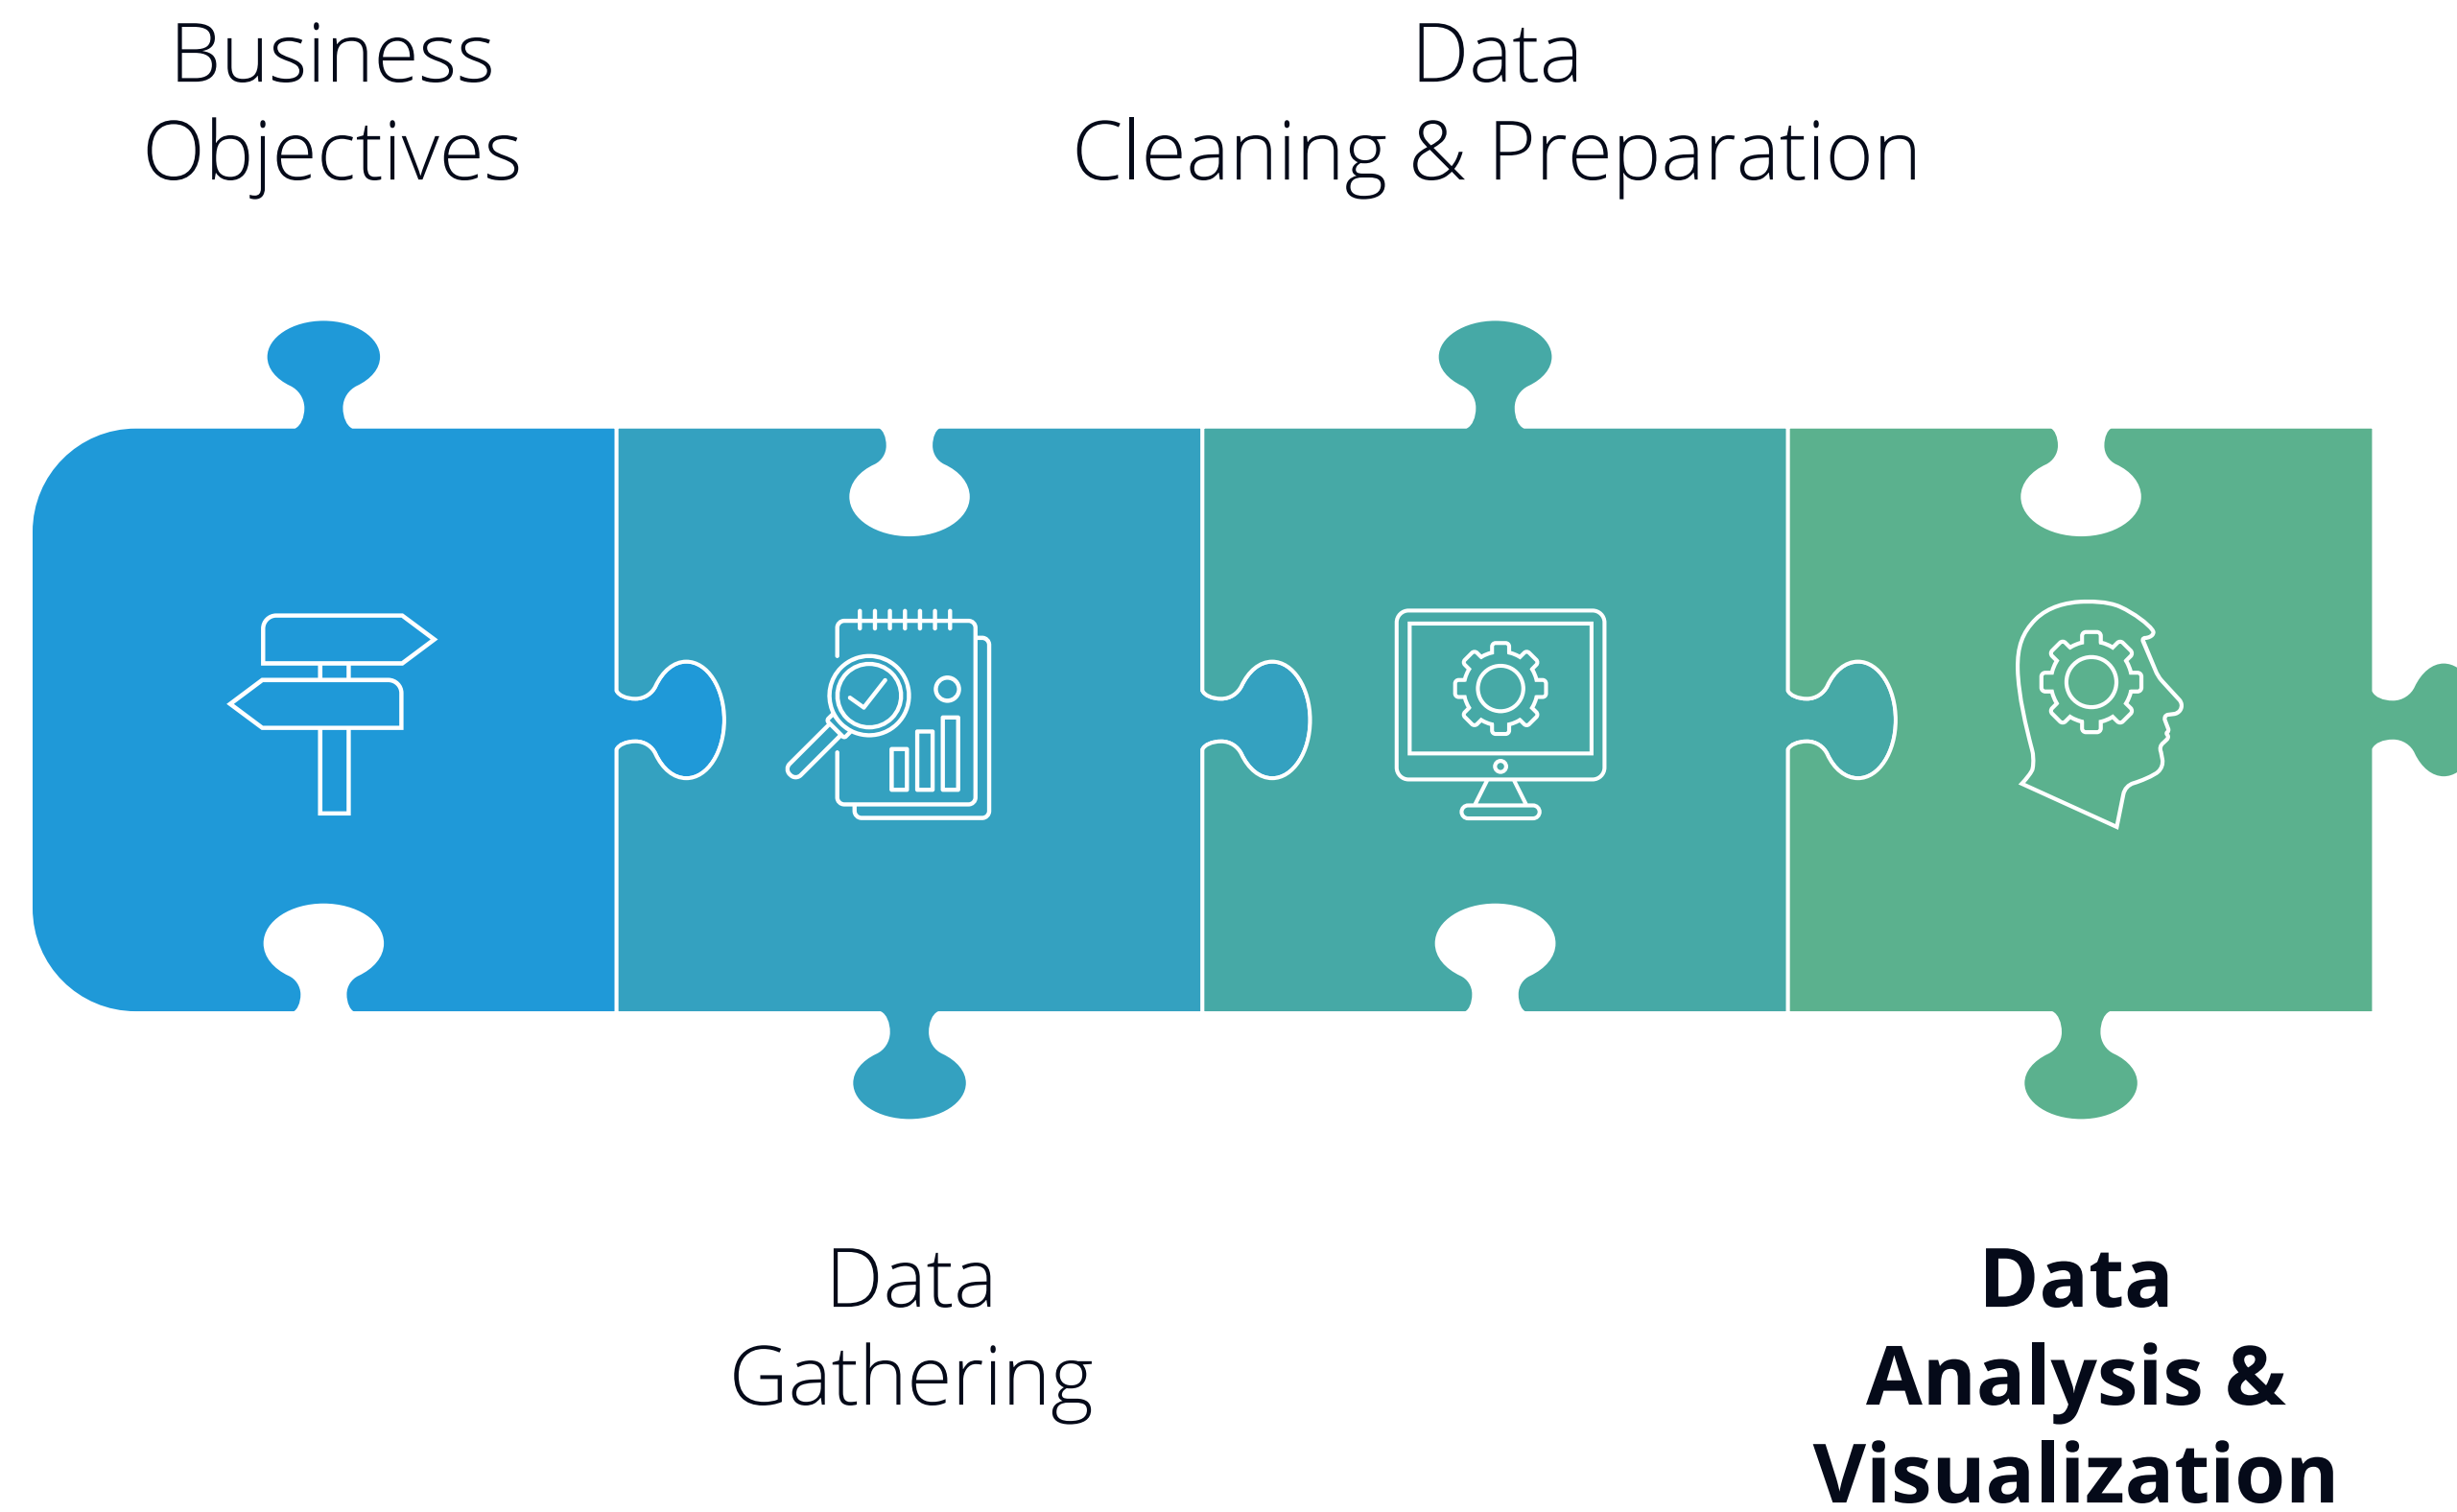

Research Process

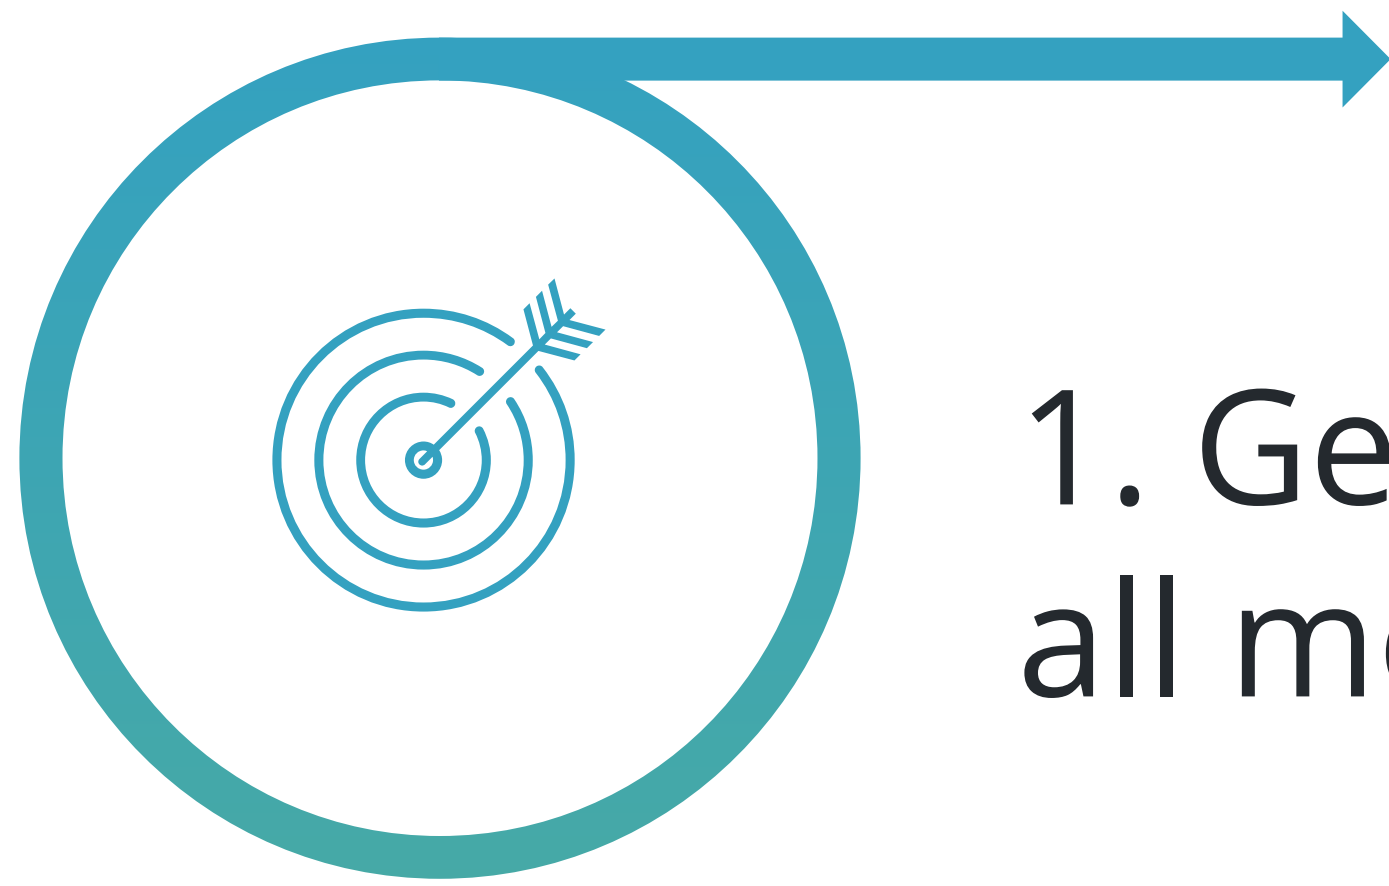

Step 3

Research Process

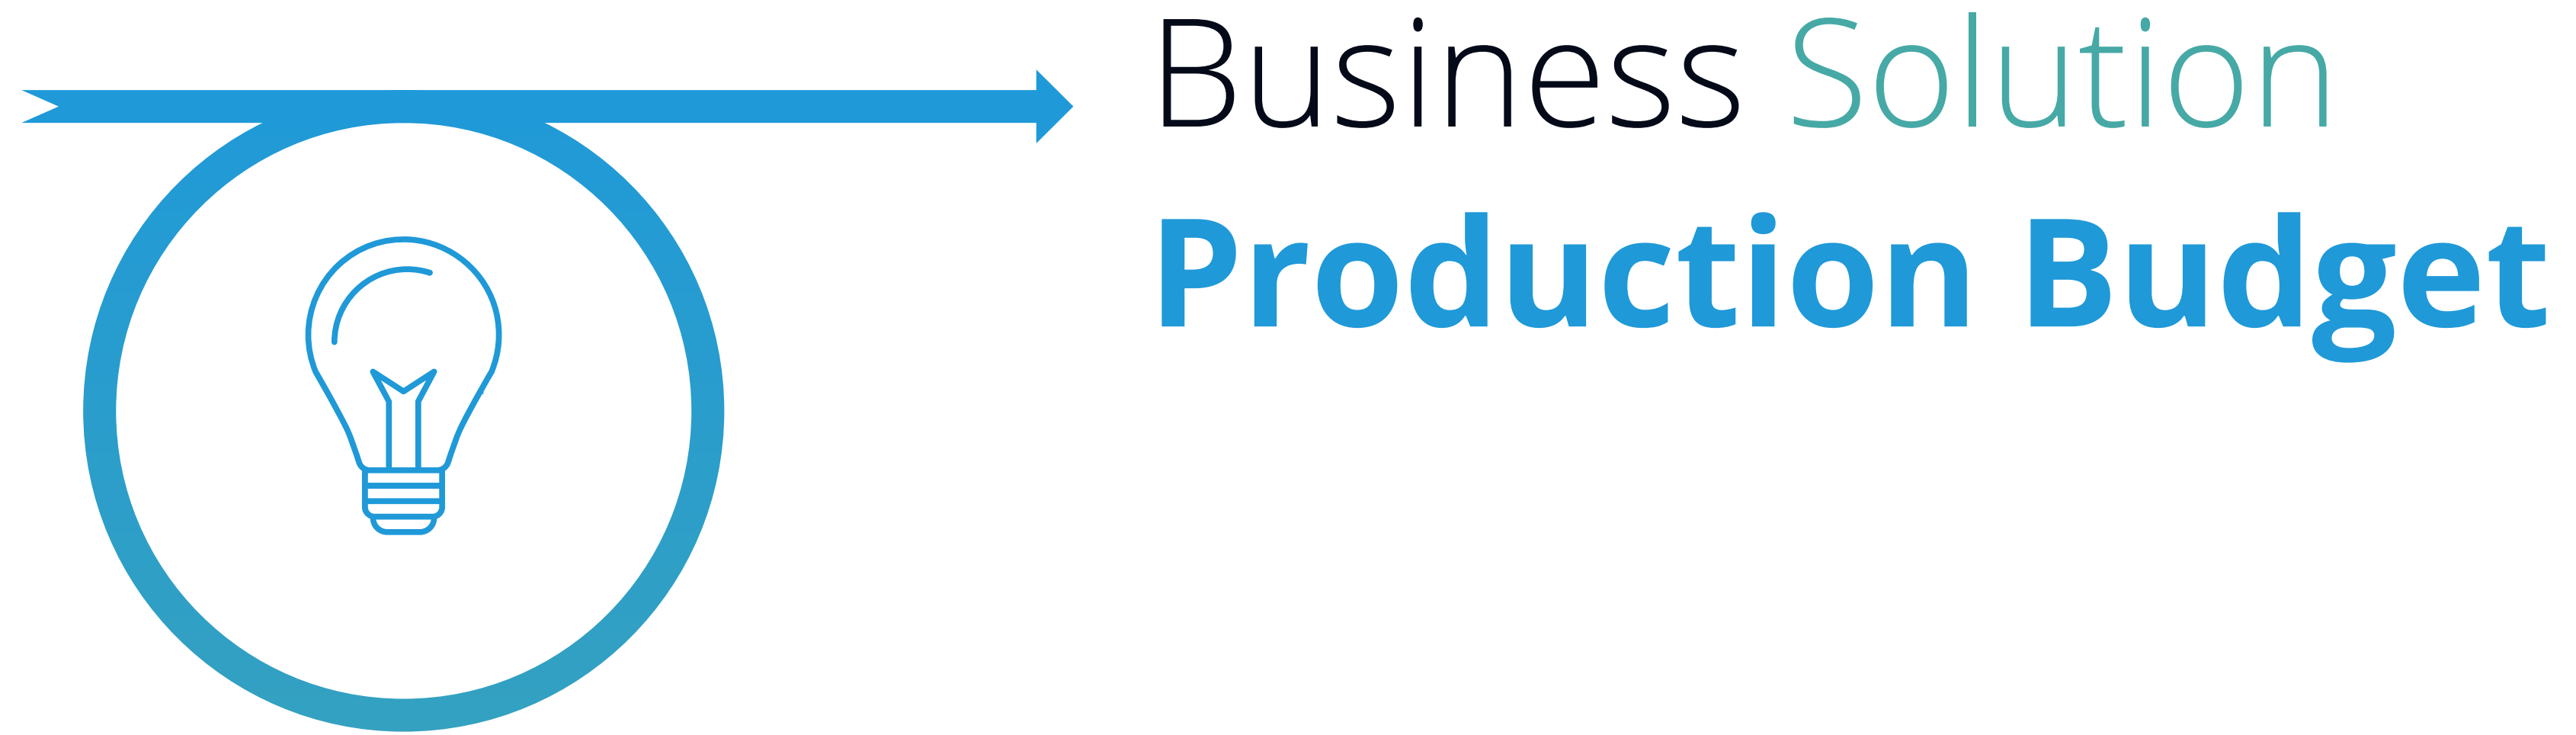

Step 4

Methodology

1. Get the **General Movies** trend/ distribution of all movies
2. Get distribution of **Top 100 Movies** to see what is done differently to reach higher success.
4. Analyze each attribute of the Top 100 Movies with respect to production budget and worldwide profit

\$68M

- The average production budget in the General Movies group is **\$68M**.
- The average production budget in Top 100 Movies group is **\$150M**.

$$r^2 = 0.358$$

- The average worldwide profit in General Movies group is **\$179M**.
- The average worldwide profit of the Top 100 Movies group is **\$624M**.

Examples

- ***Pirates of the Caribbean: On Stranger Tides*** (2011) - \$379M budget, \$1 B earned
- ***Avenger: Age of Ultron*** (2015) - \$365M budget, \$1.3B earned
- ***Spectre*** (1997) - \$300M budget, \$879M earned

- ***Facing the Giants*** (2006) - \$100,000 budget, \$24.4M earned
- ***Once*** (2007) - \$150,000 budget, Oscar nominations, \$19M earned
- ***Mad Max*** (1980), \$200,000 budget, \$49.6M earned

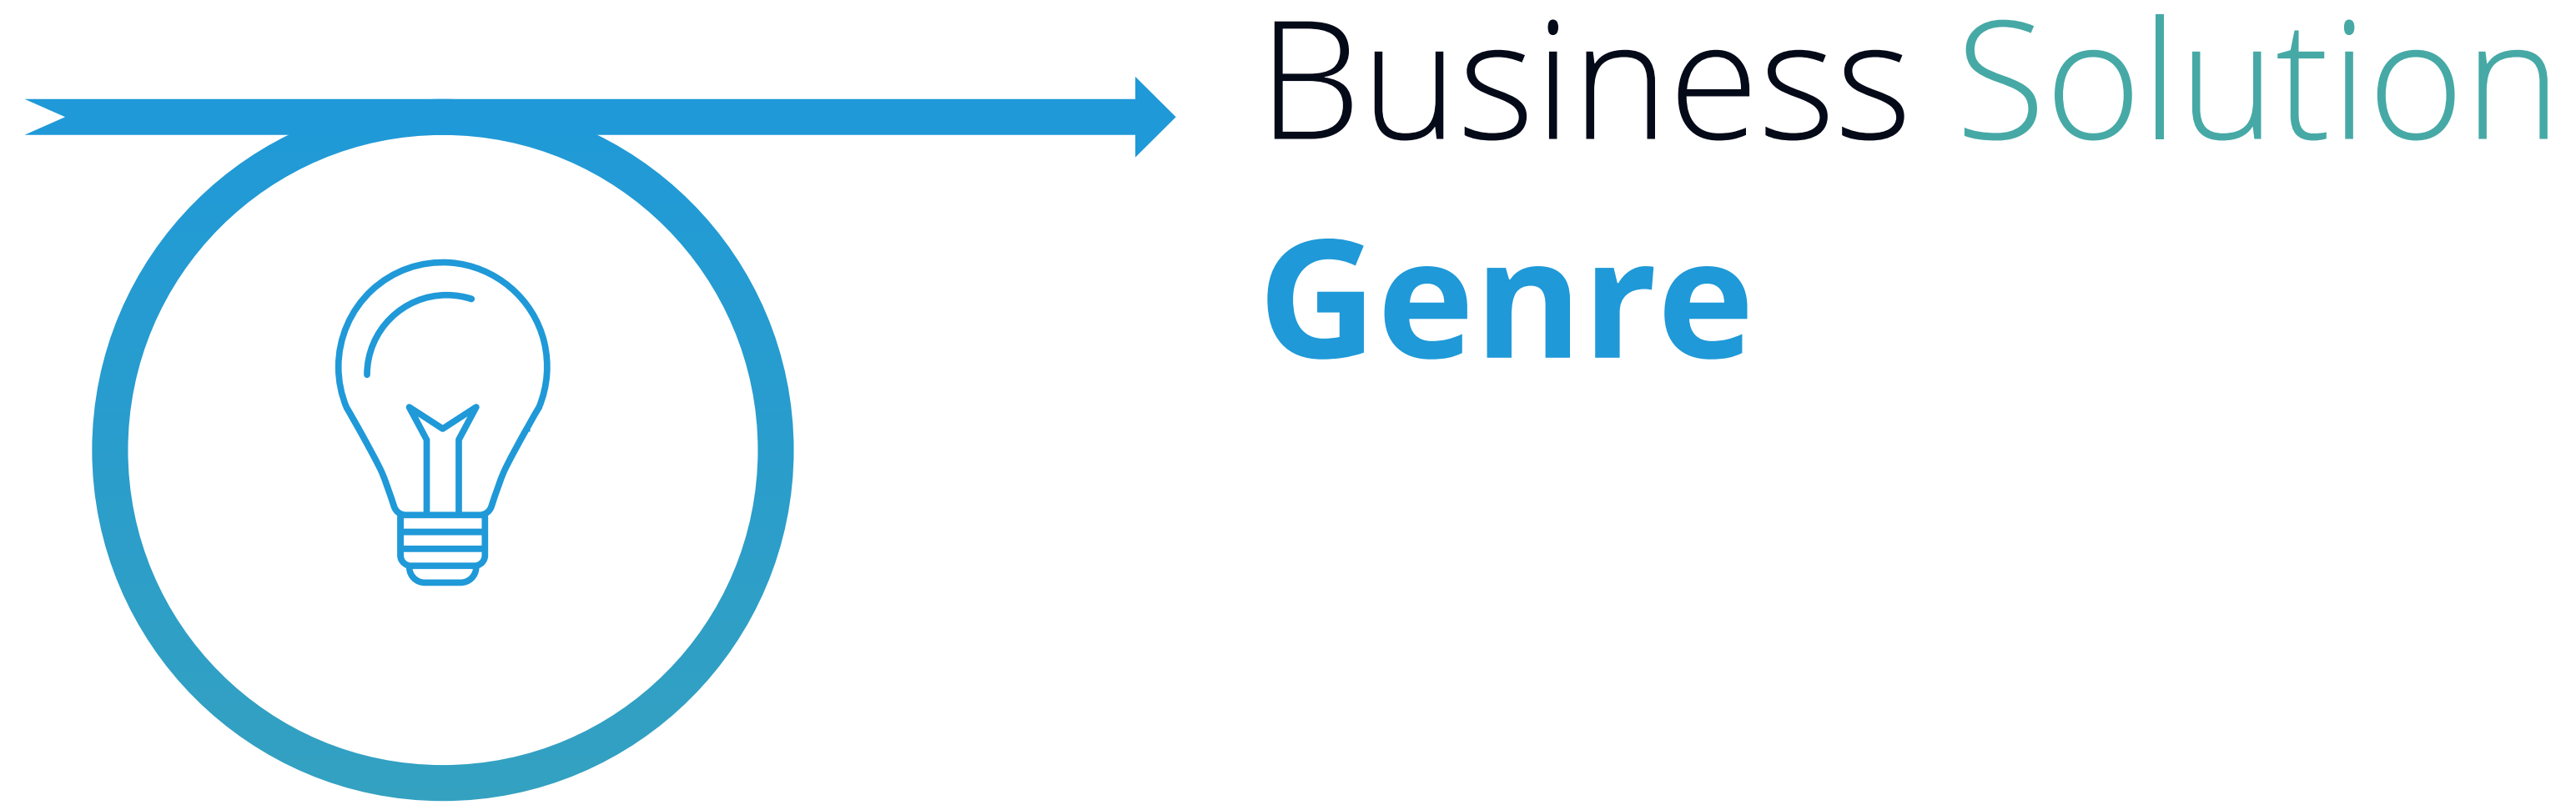

Conclusion

\$150+ M

Distribution of Genres

Distribution of Genres for Top 100 Movies

Examples

- ***Paranormal Activity*** (2007) — \$15,000 budget, \$162 millions profit, 539,336.30% ROI
- ***The Blair Witch Project*** (1994) — 20,591% ROI
- ***Night of the Living Dead*** (1990) — 13,057.89% ROI

Action = \$692M

Adventure = \$591M

Thriller/Suspense = \$587M

Action = \$186M

Adventure = \$138M

Thriller/Suspense = \$116M

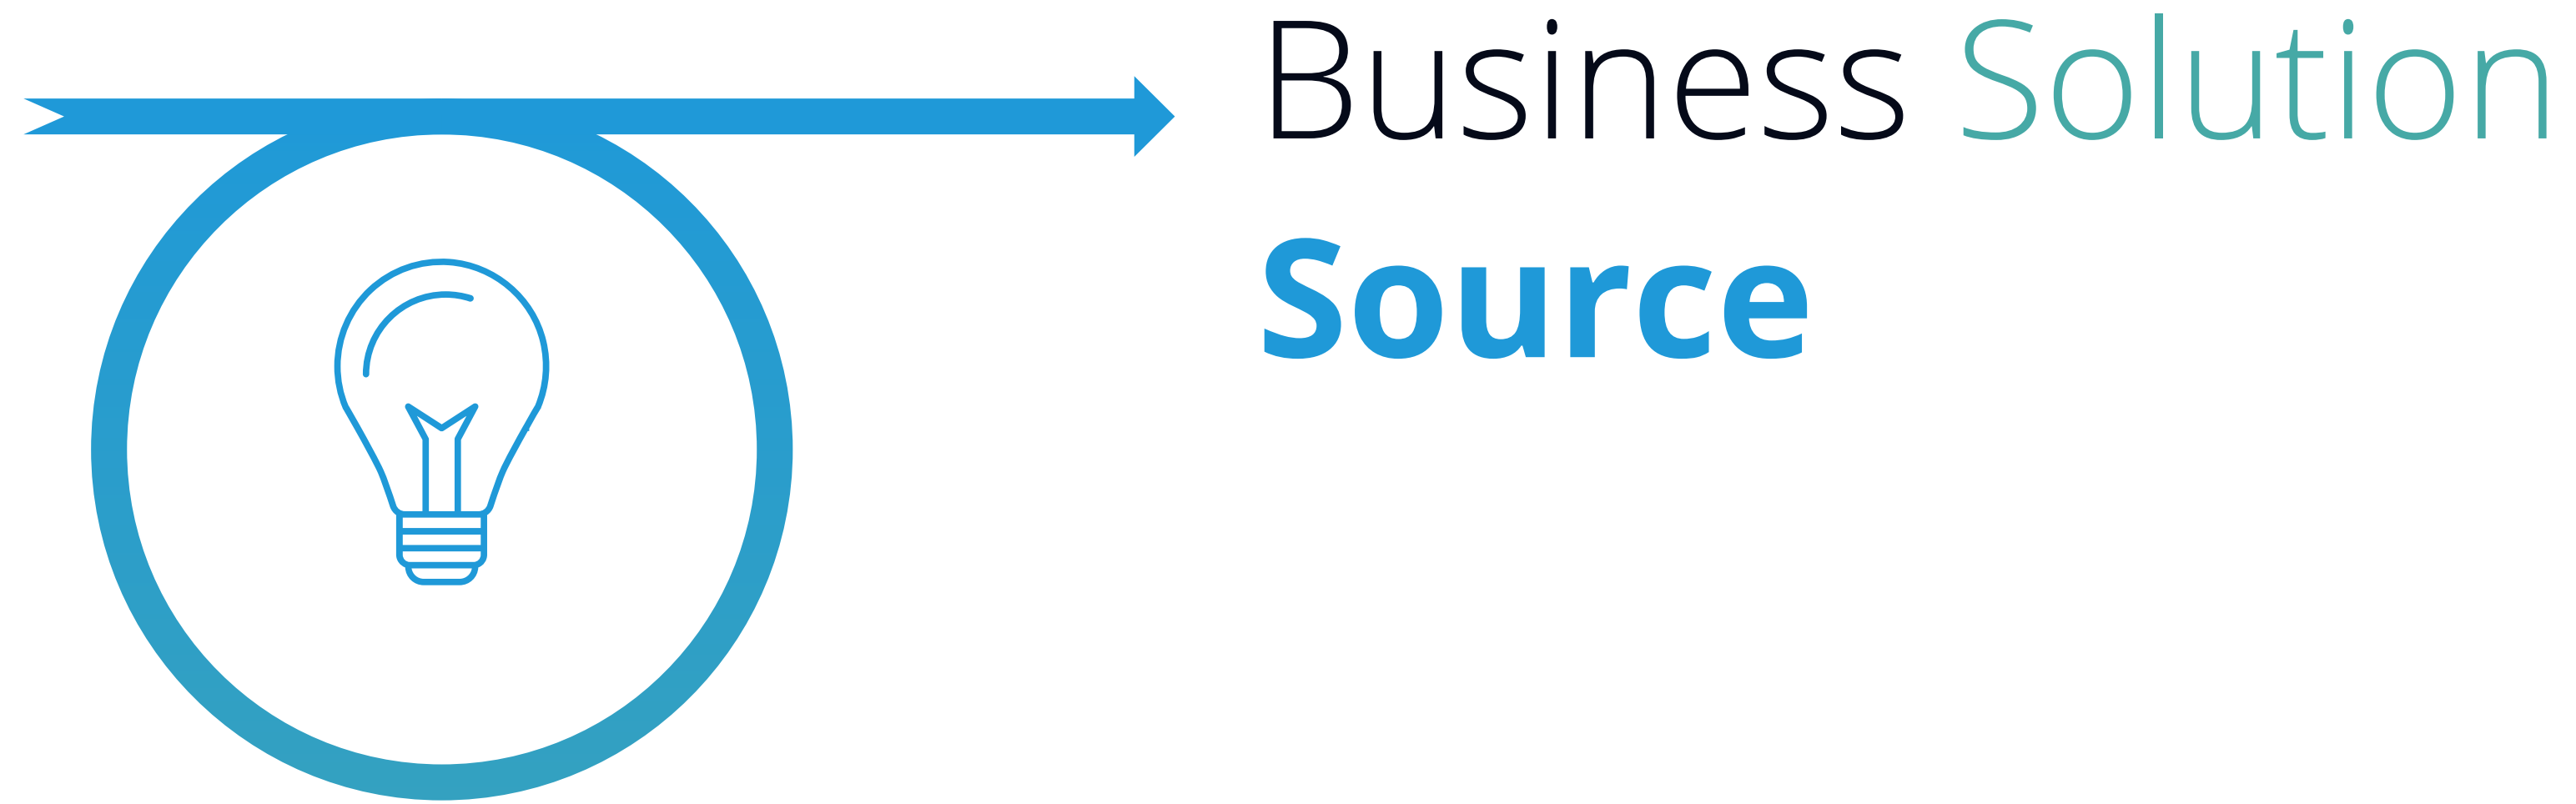

Conclusion

Action Adventure

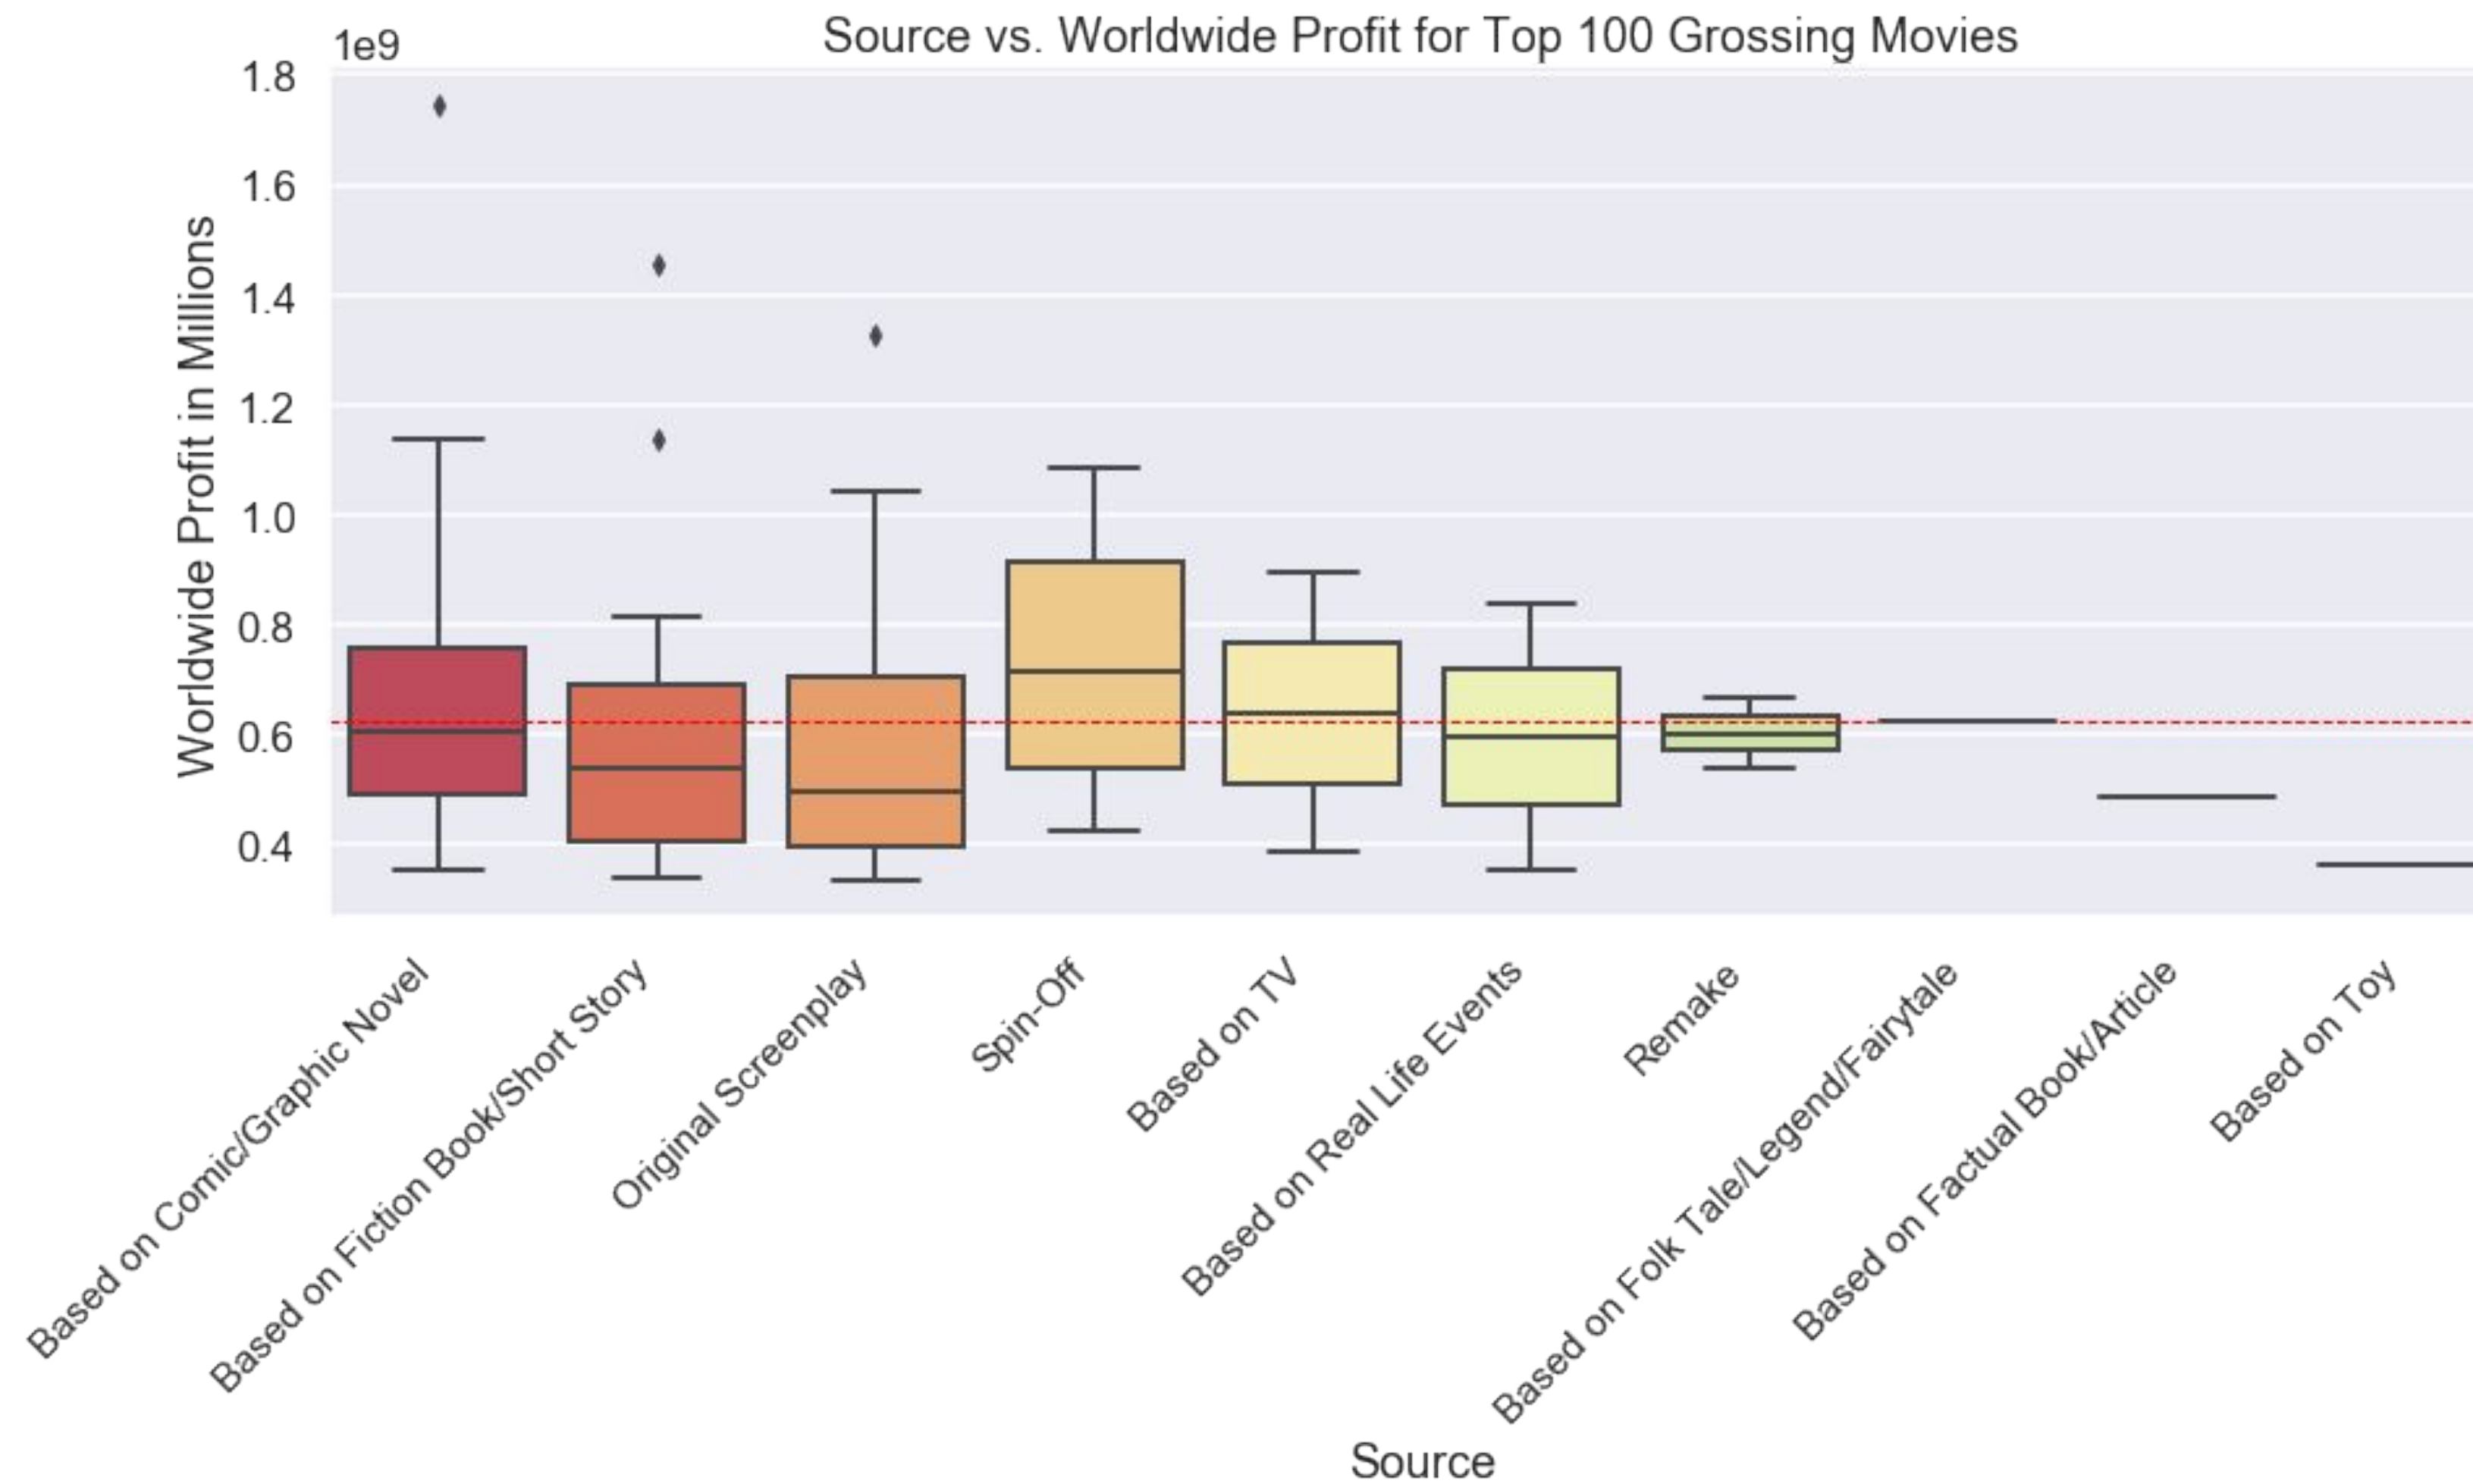

Distribution of Sources

Distribution of Sources for Top 100 Movies

Comic = \$682M

Fiction = \$610

Screenplay = \$591M

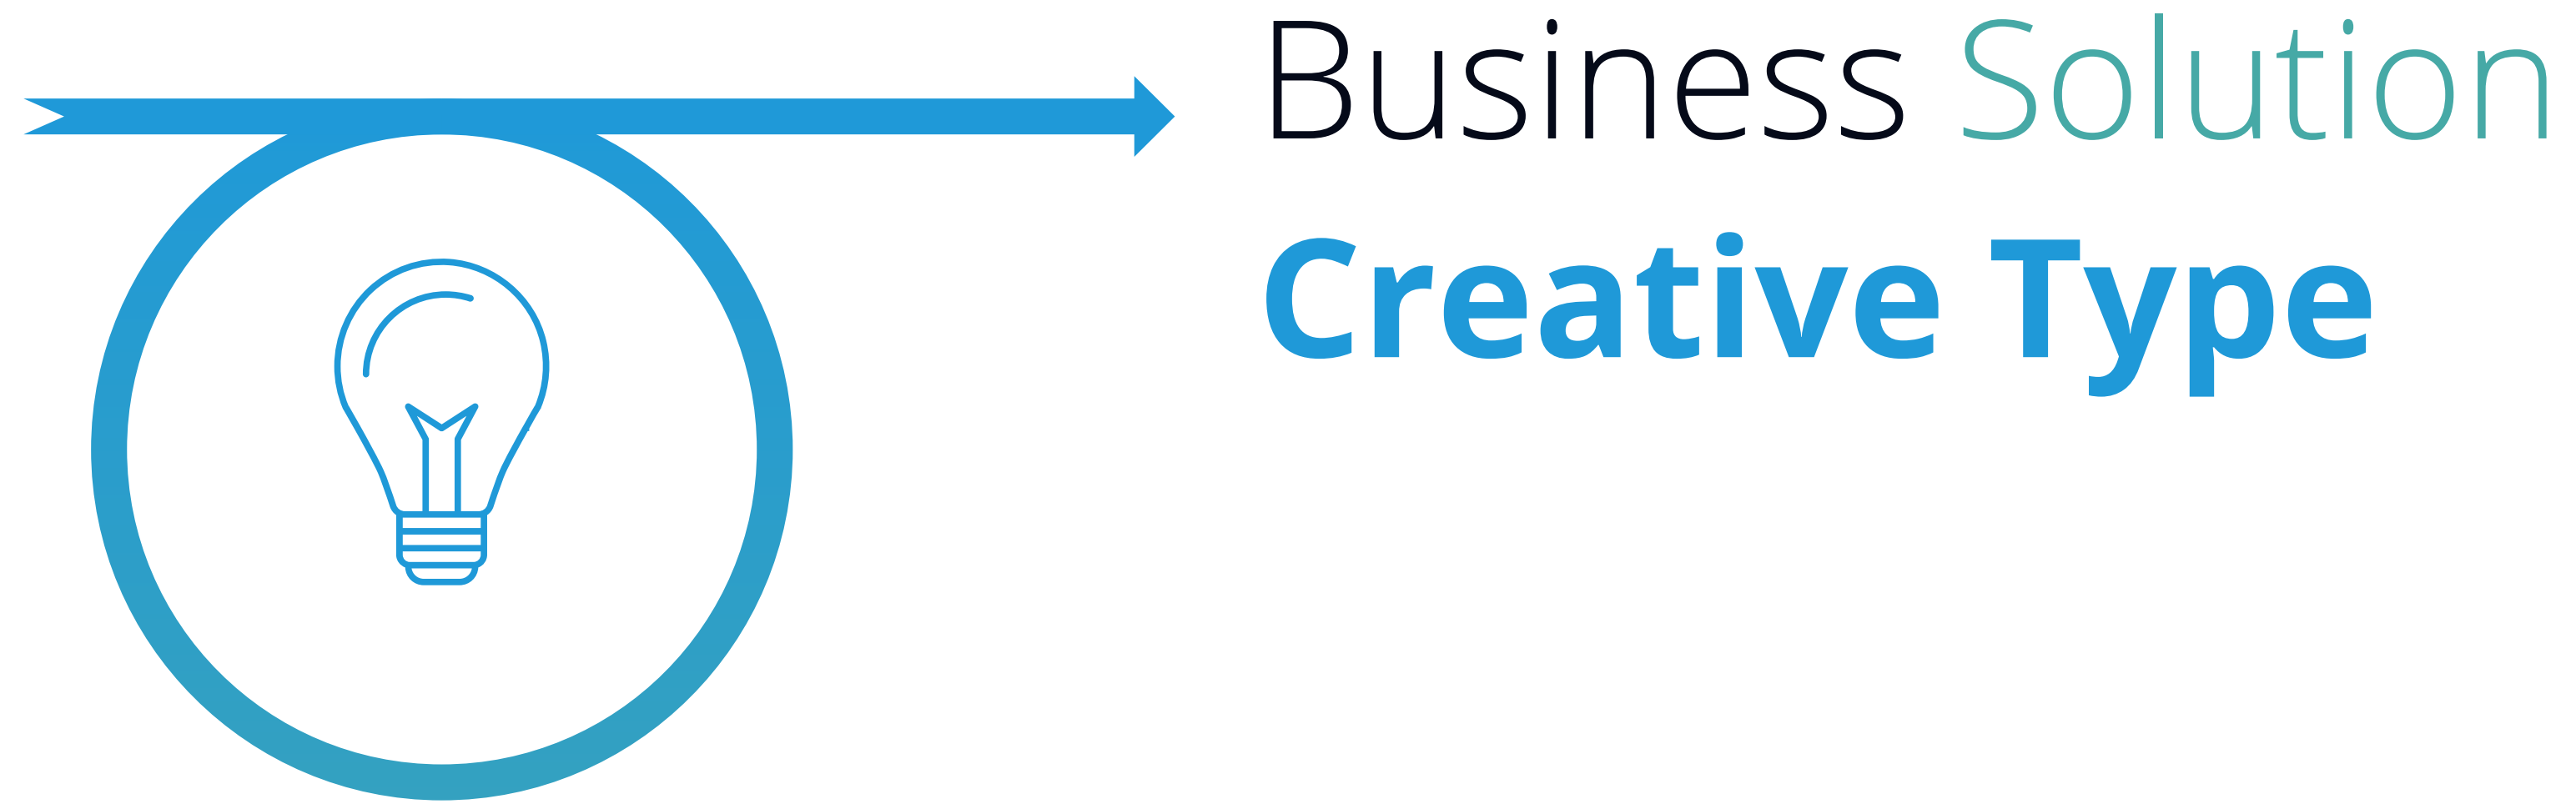

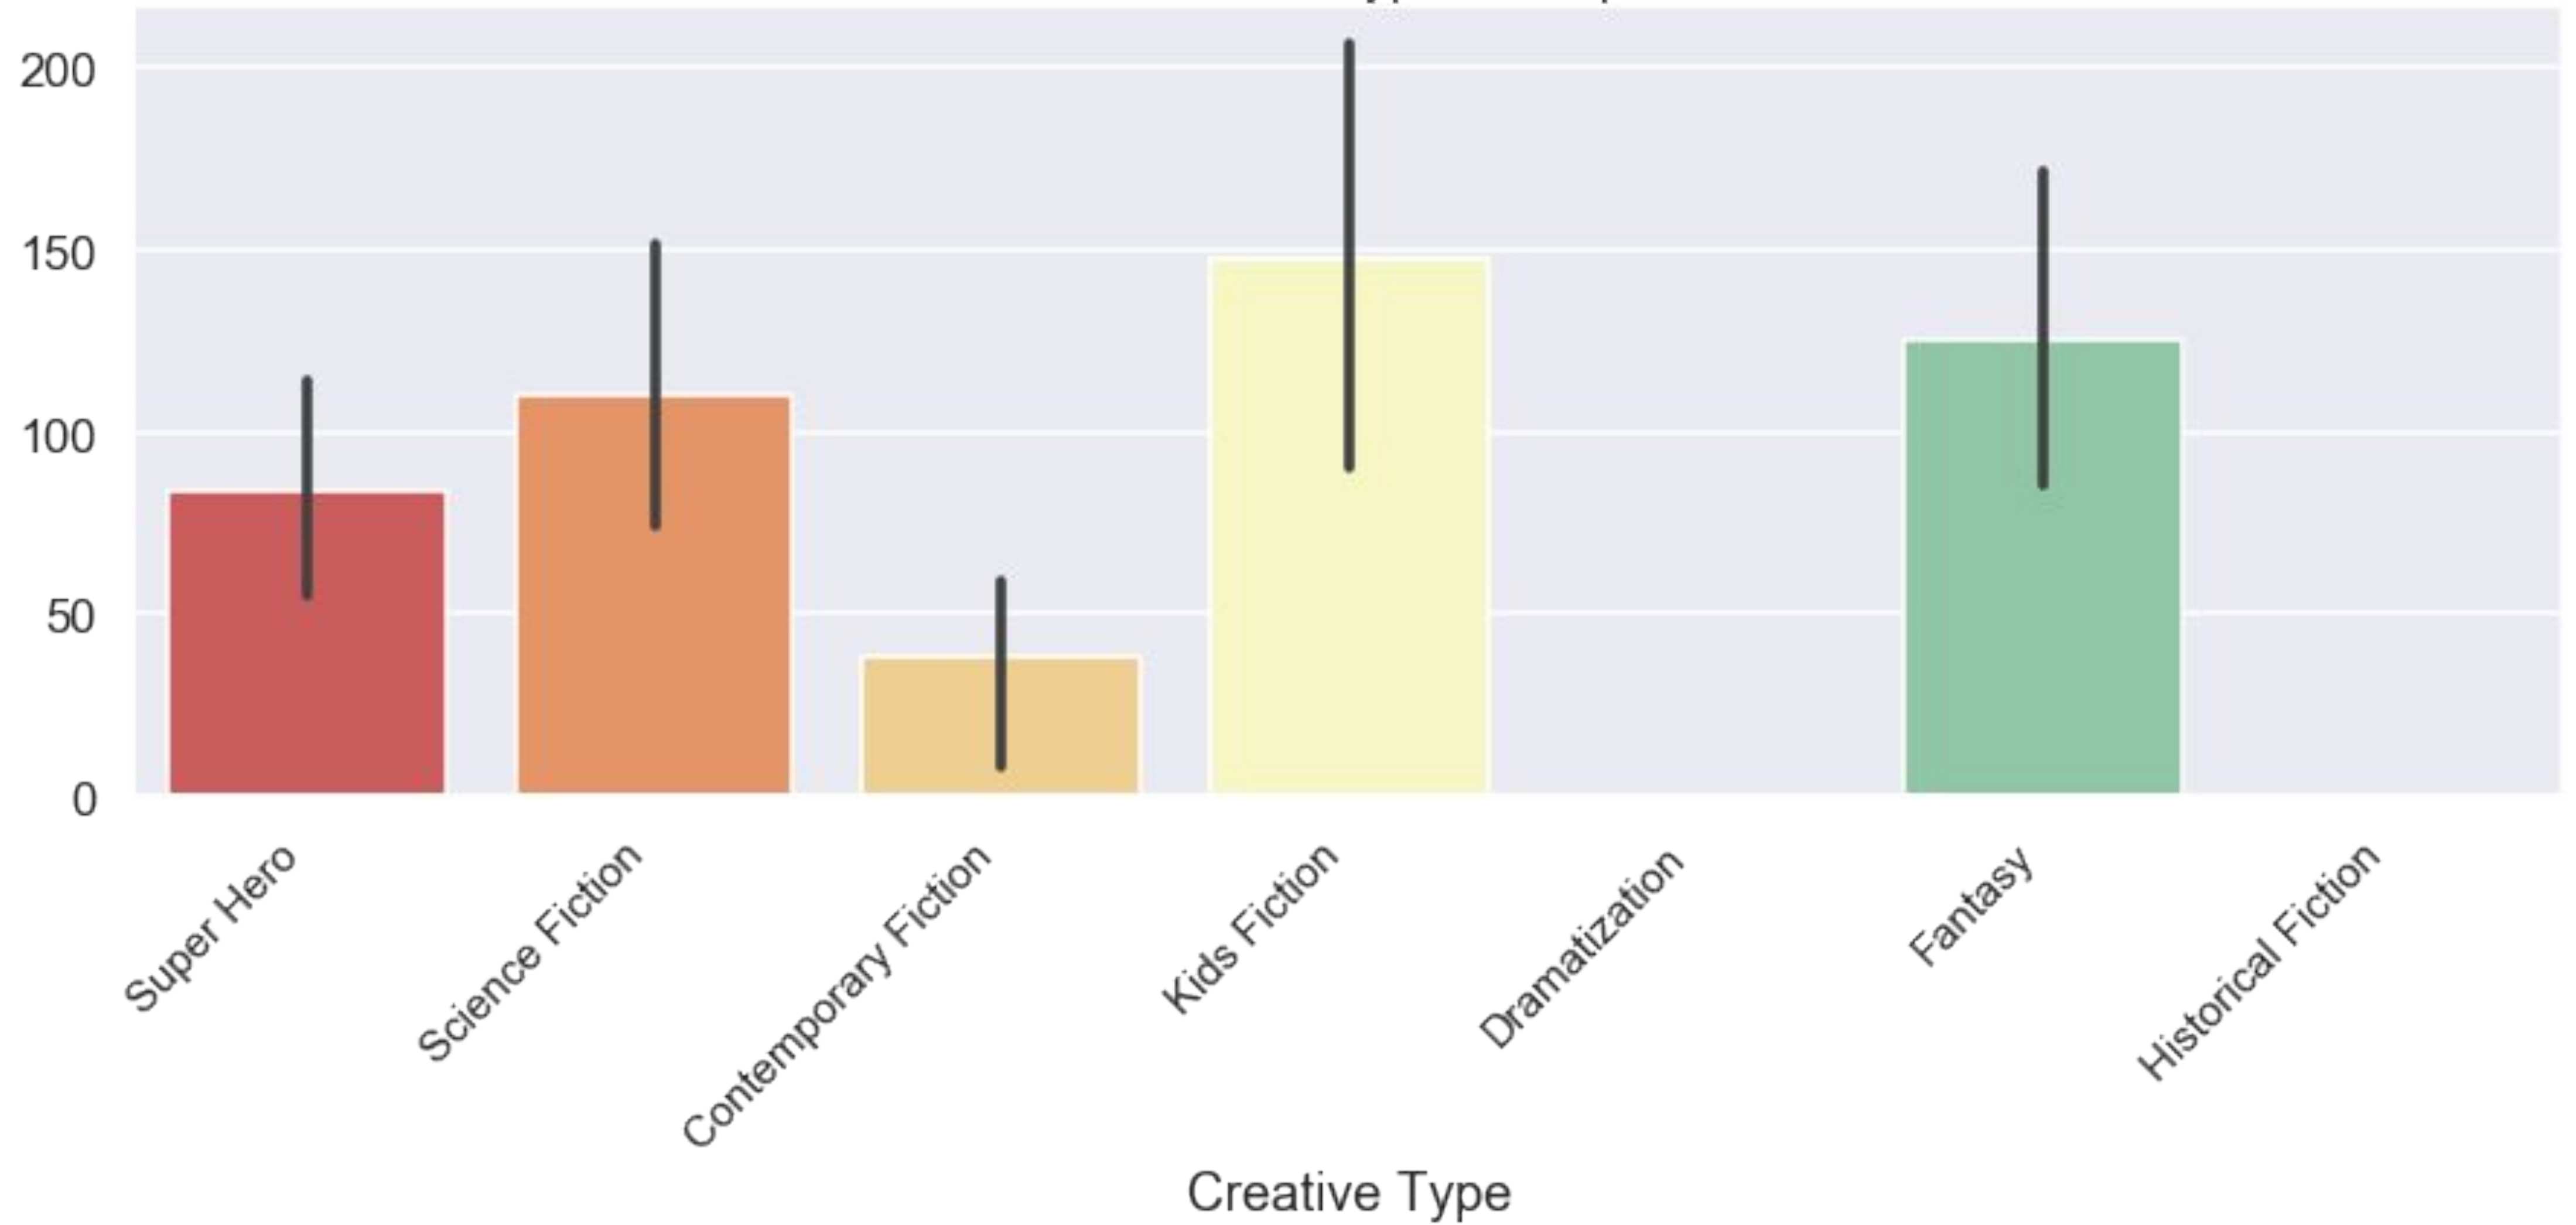

Conclusion

Comic Graphic/ Novel

Distribution of Creative Type for Top 100 Movies

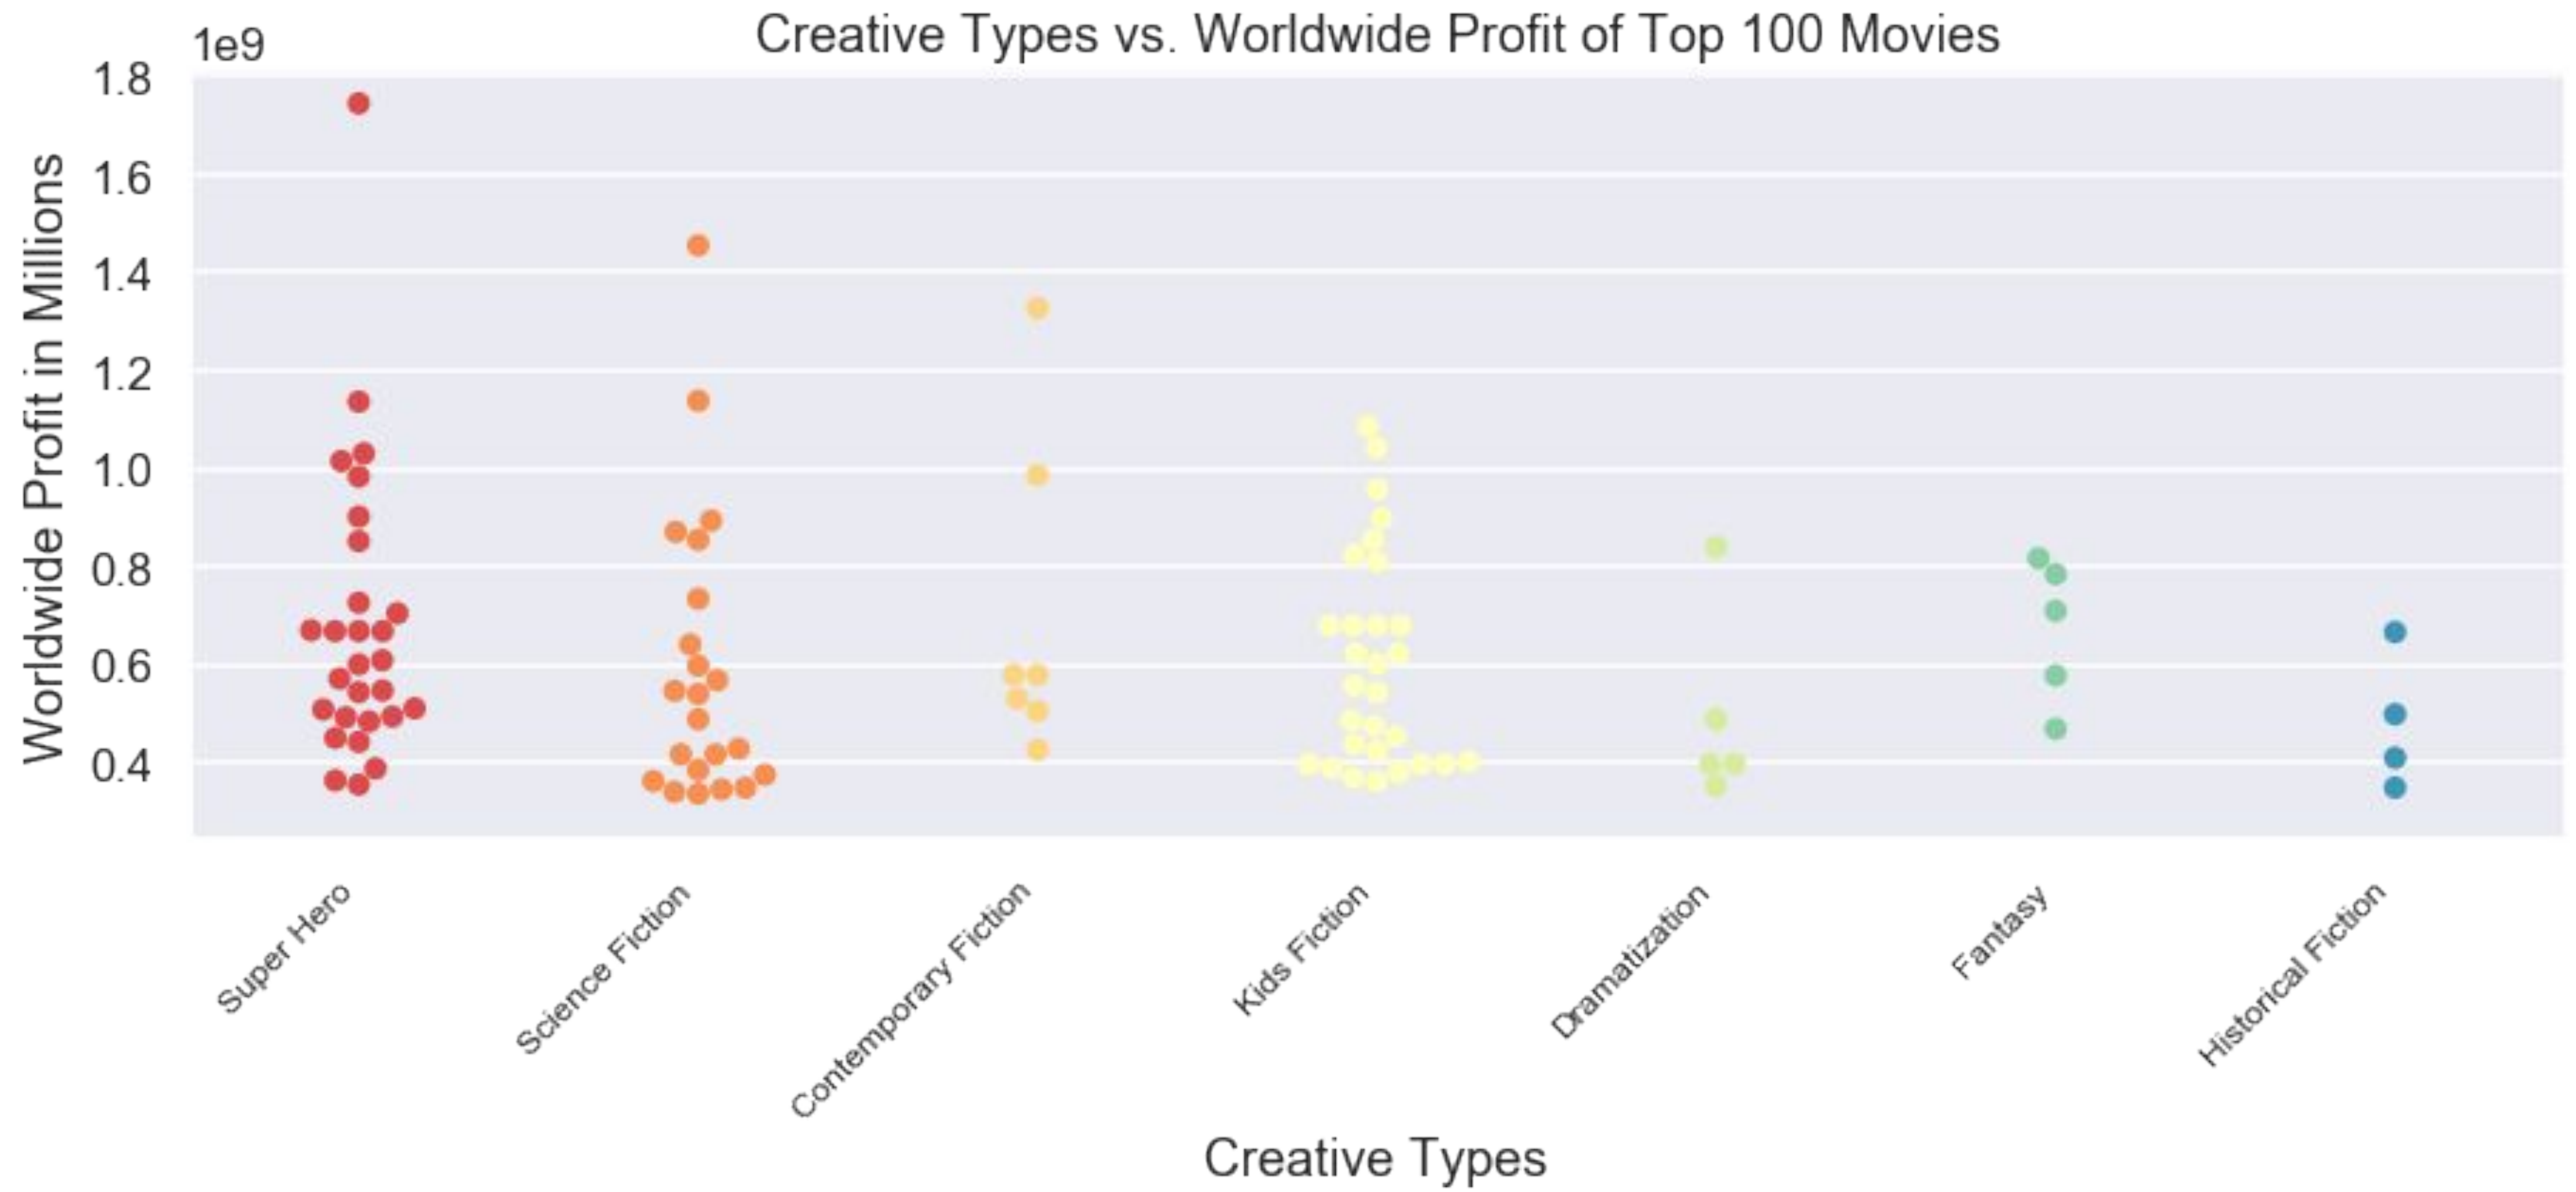

Super Hero = \$683M

Science Fiction = \$595M

Contemporary Fiction = \$705M

Conclusion

Super Hero

Distribution of Production Methods for Top 100 Movies

Animation/ Live Action = \$692M

Live Action = \$606M

Digital Animation = \$606M

Conclusion

Animation/ Live Action

- Top 100 movies score a 25 on average.
- Bottom 100 movies score a 13.2 on average.

$$r^2 = 0.274$$

- Top 100 Movies score a 7.1 on average.
- General Movies score a 6.4 on average.
- Bottom 100 Movies score a 6.1 on average.

$$r^2 = 0.089$$

- Thriller/Suspense is highest rated, not Action/ Adventure

- Original Screen Play is highest rated, not Based on Comic Graphic/Novel

- Science Fiction is highest rated, not Super Hero

- Only Animation/ Live Action remains the consistent.

Conclusion

Popularity = ✓

Rating = ✓

Examples

- Action + Science Fiction
- Based on a popular book
- Star power: Jennifer Lawrence
- Underserved need for strong female protagonists

- Most release = December, June
- Most profit = June

- Most release = June
- Most profit = February, April but not much

Conclusion

June

$$r^2 = 0.058$$
